DETAILED ACTION

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Scott M. Horstemeyer on February 17, 2006.

The application has been amended as follows:

In claim 20, 1st line, replace "The system of claim 1" with –The system of claim 2--.

In claim 21, 1st line, replace "The system of claim 1" with –The system of claim 2--.

In claim 22, 1st line, replace "The system of claim 1" with –The system of claim 2--.

In claim 23, 1st line, replace "The system of claim 1" with –The system of claim 2--.

In claim 24, 1st line, replace "The system of claim 1" with –The system of claim 2--.

Allowable Subject Matter

Claims 2, 4, 5, 8, 13, and 18-32 are allowed.

The following is an examiner's statement of reasons for allowance: while Skemer et al. disclose the fragmentation of network information for the transmission of voice and data over a network, and Downes discloses Ethernet networks are the most common type of network, neither Skemer et al. nor Downes disclose any details as to how to perform the specific fragmentation of an Ethernet frame. Therefore, the combination of Skemer et al. and Downes does not disclose or suggest replacing a first data value at a first location in a stored Ethernet frame identifier, with the first replacement location being based on the line rate of the Wide Area Network (WAN), as required by claim 2. Similarly, the combination of Skemer et al. and Downes does not disclose or suggest replacing a data value at the Nth byte within a stored Ethernet frame with a first frame identifier, where the fragmentation size N is based on the line rate, as required by claim 8. Additionally, the combination of Skemer et al. and Downes does not disclose or suggest labeling the Nth byte from the start of a received Ethernet frame with an identifier marking the end of a fragmented packet, where N is based on the line rate of the WAN, as required by claim 13.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
